

MentorPi Ackermann 2025 Version

Upgrade Overview

The 2025 MentorPi Ackermann model represents the latest advancement in our series. Significant structural enhancements have been made to increase the steering angle, which has been raised from 29° in the 2024 model to 40° in the 2025 version. This increase results in a notably smaller turning radius.

These improvements greatly enhance the vehicle’s agility and maneuverability, especially in confined spaces and complex terrains.

The reduced turning radius makes operations such as U-turns and sharp cornering easier and more efficient, improving overall usability.

NO.	Name	2024 MentorPi Ackermann	2025 MentorPi Ackermann
1	Design		
2	Steering System		

		Servo steering angle: 29°	Servo steering angle: 40°
--	--	---------------------------	---------------------------

For the latest functionality and gameplay features, please refer to the 2025 version documentation.

The detailed hardware upgrades are summarized in the table above.
